## SHEATH MATERIAL AND SIZE

Consult the material selection table below, then choose the sheath material and size and record the catalog type from the chart. For materials not listed below, consult Conax Technologies.

Example: With a .125" OD type 304 Stainless Steel sheath, the catalog number becomes

| SHEATH            | MATER           | IALS*** a                   | nd SIZES     |  |                      |  |  |                        |          |       |        |
